Status: 03/2023

Label printers for printing on both sides of a material

# XD Q label printers for printing on both sides of a material

## Highlights

- 300 dpi if printing as wide as 105.7 mm
   600 dpi if printing no more than 54.1 mm wide, using a DR4-M60 print roller
  - Print heads designed for 300 dpi and such for 600 dpi are not interchangeable on the unit.
- **Heating** can be assigned separately to each print head.
- If printing only on the top of a material using print head 2, print head 1 is automatically lifted and the ribbon is stopped by an electromechanical brake.
- Guiding materials in centered position results in precise print images in particular with slim continuous materials are in use. The width of a material is set with the help of a spindle.
- Automated ribbon saving is provided on print head 1
  when printing on the bottom of a material. The print head
  is lifted and the ribbon is stopped during material feed.

- **Continuous print images** when cutting or perforating labels at no backfeed.
- **Optimized printing,** so that multiple print jobs can be printed seamless and without loss of labels.
- CSQ cutters and PSQ perforation cutters
- A separator is part of the chassis.

It separates continuous material reliably from a ribbon and improves the accuracy of feeding.

Draw roller quality:

Steel roller standard if printing on textile materials

Print roller an option with shrink tubes
The pressure system can be pivoted if required.

Find documentation on the Internet.
 DVDs are no longer part of delivery.

Textile tapes Cardboard labels Identification strips

Cable marking Shrink tubes continuous or ready for use

Labels Printing only on the top of a material using print head 2

# Types of printers

## XD Q providing a tear-off plate

All materials wound on a roll or a reel can be printed, so can fanfold ones.

Label printer		XD Q4/300	XD Q4.2/600
Print resolution	dpi	300	600
Print speed	mm/s max.	200	100
Print width	mm max.	105.7	54.1
Width of a material	mm max.	114	114

## XD Q providing a CSQ 402 cutter

Paper labels and self-adhesive labels, cardboard and synthetic materials can be cut, so can shrink tubes.

Label printer		XD Q4/300-C2	XD Q4.2/600-C2
Print resolution	dpi	300	600
Print speed	mm/s max.	200	100
Print width	mm max.	105.7	54.1
Width of a material	mm max.	114	114
Tray Materials as	wide as mm	100	100

## XD Q providing a PSQ 403 perforation cutter

Continuous materials such as shrink tubes can be perforated, to simplify separation by hand at a later stage. Cutting a material is as well possible.

Label printer		XD Q4/300-P3	XD Q4.2/600-P3
Print resolution	dpi	300	600
Print speed	mm/s max.	200	100
Print width	mm max.	105.7	54.1
Width of a material	mm max.	114	114
Tray Materials as	wide as mm	100	100

<sup>1)</sup> Specifications are standards. Operations including small, slim, thick or stiff materials need testing, so do strongly adhesive labels.

<sup>&</sup>lt;sup>2)</sup> A ribbon should be at least as wide as the liner material.

Free and Open Source software in cab products: www.cab.de/opensource

# OPC UA

All the latest cab printers have been designed ready for interacting with machines and components of different manufacturers in industrial plants. An OPC UA server is part of the firmware.

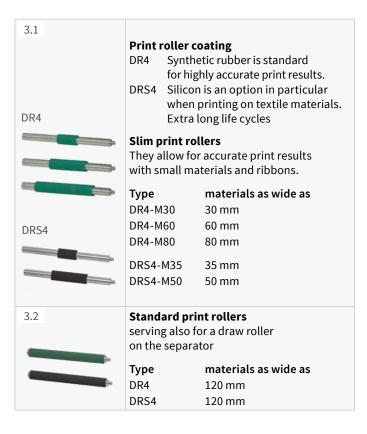

# Accessories / optional equipment

Accessorial products are plugged or screwed to a printer by a customer.

Options are parts or units to perform special functions. They are assembled to a printer in addition to or instead of standards. If order implies options be assembled ex factory, corresponding item numbers are added by .250. Options delivered separately are added by .001.

2.1	SD memory card
2.2	USB stick
2.3	USB WLAN stick 2.4 GHz 802.11b/g/n Hotspot mode or infrastructure mode
2.4	USB WLAN stick with a rod antenna for extended range of operation 2.4 GHz 802.11b/g/n + 5 GHz 802.11a/n/ac Hotspot mode or infrastructure mode
2.5	USB Bluetooth adapter
2.6	Adapter 40/100 for picking up label rolls with a core diameter of 100 mm  One adapter is sufficient if processing
3.3	Digital I/O interface Labeling is triggered via a PLC, a sensor or a hand switch. Status reports and errors are displayed simultaneously.
3.4	I/O interface plug SUB-D, 25 pins, for connecting all control signals to the I/O interface

# Rewinding

**External ER4 rewinder,** power supply built in Label webs may be wound outside or inside. They are wound consistently and tight by electronic control, with a pendulum arm.

External rewinder		ER4/210	ER4/300
Width of a metarial	mm max.	12	20
Roll diameter	mm max.	205	300
Tightening axle co	ore diameter in mm	7	6
Winding		outside (	or inside
Voltage		100 - 240 V	/, 50/60 Hz
Adapter kit			

# Cutting, perforating, stacking

## 2.8 CSQ 402

## Cutters and perforation cutters

Paper, cardboard, textile and synthetic materials can be cut resp. perforated, so can shrink tubes, continuous or ready for use.

Differences between CSQ and CU resp. PSQ and PCU cutters:

- CSQ / PSQ can be pivoted to simplify material changeover.
- CSQ / PSQ are cutting twice as fast as CU /PCU cutters.
- CU / PCU cutters are still recommended with textile operations.

If perforating with a PSQ, six off-cuts remain at the center, each at a distance of 2.5 mm. At the left and right of a perforation, the material is entirely cut. If perforating with a PCU, there is off-cutting along the entire width.

Cutter	CSQ 402		CU400	
Perforation cutter		PSQ 403		PCU400
Material:				
Passage width mm max.	13	20	120	
Passage height mm max.	2	.0	2	2.0
Weight (cardboard) gr/m² max.	30	00	3	00
Thickness mm max.	1	.1	1	1
Perforation:				
Distance between off-cuts mm	-	2.5	_	2.5
Off-cut width mm	-	0.4	-	0.5
Number of off-cuts	-	6	-	48
Cutting length mm at least	10	10	5	5
Perforation length mm at least	-	3	-	5
Tray Materials as wide as mm	100	100	100	100
Performance cuts/min at use of material 1 mm high, no backfeed	20	00	1	00
	no final cutter position			n
Controls	cutter cove	er removed		-

# 2.12 ST400 M

## ST400 M stacker providing a cutter

Printed materials can be cut and then collected.

Print jobs stop if the maximum number of labels have been collected. Limitations may occur with stiff or curved materials. cab recommends to have such operations tested.

Stacker providing a cutter			ST400 M
Material	Passage width	mm	20 - 100
	Passage height	mm max.	1.2
	Weight (cardboard	d) gr/m <sup>2</sup>	60 - 300
	Thickness	mm	0.05 - 0.8
Cutting len	ngth	mm	20 - 150
Performance cuts/min at use of material 1 mm high, no backfeed		100	
Limit of collecting mm max.		100	
Controls: no final cutter position, stacker cover open, lim			

## Support table - label W x H

The table and the protective cover are adapted to the size of a label. Please request individually.

# cablabel S3 software

## Design, print, administrate

cablabel S3 opens up the full potential of cab devices. Defining a label is first. Modular design adapts cablabel S3 to requirements step by step. Plug-ins are embedded. Native JScript programming, for example, is supported by the JScript Viewer. The designer user interface and JScript codes synchronize in real time. Optional features can be integrated, such as the Database Connector or barcode verifiers.

# Printer control

## **Drivers**

cab provides drivers to control a printer with software other than cablabel S3.

Free download on www.cab.de/en/support

## **Programming**

### **JScript**

cab printers embed JScript language. Download free manual on www.cab.de/en/programming

abc Basic Compiler

Integral to the firmware, abc in addition to JScript enables advanced programming before data are edited for printout. For example, external printer languages can be replaced without intervening in a print job in progress. Data may be imported as well from other systems such as scales, barcode scanners or PLC.

## Integration

cab as a member of this program developed a replace method for controlling cab printers from SAP¹¹ R/3 using SAPScript. Only variable data are sent by a host system to a printer. They add on the printer to local images and fonts (IFFS, memory card, etc.).

# Stand-alone operation

This operating mode enables a printer select and print labels while not connected to a host system. Labels can be designed using software such as cablabel S3 or a text editor on a PC. Label formats, texts, graphics and data of a database can be stored on a memory card, a USB stick or a printer's IFFS memory. Only variable data are sent by a keyboard, a barcode scanner, a scale or any other host system to a printer, or be recalled by the Database Connector from a host and printed.

# Printer administration

## Configuration on the Intranet / Internet

Integral HTTP / FTP servers enable a printer be controlled or configured, firmware be updated and memory cards be administrated using standard applications such as a web browser or a FTP client.

Administrators and operators on behalf of SNMP / SMTP are notified of states, alerts and errors by email or SNMP datagrams. Time and date are synchronized by a time server.

## **Database Connector**

Printers in a network may access data from a ODBC / OLEDB database and print it on labels. Data can be rewritten to a database while print jobs are in progress.

<sup>&</sup>lt;sup>1)</sup> SAP and associated logos are trademarks or registered trademarks of SAP SE.

# Delivery program

## **Label printers**

Pos.		Item no.	Designation
1.1		6011500 6011505	XD Q4/300 label printer XD Q4.2/600 label printer

## **Accessories**

Accessorial products are plugged or screwed to a printer by a customer.

See further accessories on www.cab.de/en/xdq-accessories

## **Optional equipment**

Options are parts or units to perform special functions. They are assembled to a printer in addition to or instead of standards. If order implies options be assembled ex factory, corresponding item numbers are added by .250. Options delivered separately are added by .001.

## Accessories / optional equipment

Pos.		Item no.	Designation
2.1		5977370	
			SD memory card
